CATALOGUE KEY		SUMMARY	
YWT	Rams with a high YWT ASBV produce lambs that grow quicker and are heavier.	Date of Birth :	JUL/AUG/SEP, 2024
PWT	Rams with a high PWT are earlier maturing animal.	Rams Shorn :	24/03/2025
YEMD	Eye Muscle Depth. Rams with a more positive EMD produce progeny with more muscle and higher lean meat yield.	Muscle Scanning :	6/06/2025
YFAT	A higher fat ASBV assists with the health of the animal and it's ability to deal with worm infestation.	Side Sample :	7/08/2025
YWEC	Worm Egg Count. The more negative the number the worm resistant the animal is.	Faecal Egg Counts :	30/04/2025
YCFW	Clean Fleece Weight. Rams with a higher CFW produce progeny that cut more wool.	Brucellosis :	FREE
YSL	Staple Length - higher is a longer staple	Vet Checked :	18/08/2025
YFD	Fibre Diameter - lower is finer	Rams Weighed :	3/09/2025
YSC	Scrotal size. Rams with a more positive scrotal will produce more fertile daughters.	SALE CONDITIONS:	
IMF	Intermuscular Fat is heavily tied to eating quality, the higher the number the more they have.	1. The purchaser must be nominated on auction plus.	
WR	Weaning rate the higher the number the more live weaned lambs.	2. The purchaser can use the semen from rams for their own requirements.	
CV FD	Coefficient Variation of Fibre Diameter	3. Under selling agreement with Karbullah Poll Merinos, Karbullah Poll Merinos retain all marketing rights of any semen sold from purchased rams.	
CF	Comfort factor	4. If a ram is resold, the new owner must be made aware that Karbullah Poll Merinos retain all marketing rights of any semen sold.	
SD	Standard Deviation	5. 2% commission will be paid to any agent introducing and accompanying clients to the sale on Sept 15. Introductions must be made in writing to Steve Maunder at lrwrural@outlook.com, 24hrs prior to the 15th Sept, 2025.	
CV	Curvature	6. Rams come with a 12 month breeding soundness guarantee from the time of purchase. Any claim against breeding ability of any Karbullah purchased ram must be made in writing and be accompanied by a vet certificate and/or photo for proof of death. All costs to be worn by the purchaser. We recommend you insure animals against injury (loss of use) and death.	
TW	Twin born and twin reared	7. If arrangements have been with Karbullah principles for rams to remain on our PIC QFWM0132, insurance must be obtained for the ram.

Commercial ram buyers guide to genetic selection

What a Australian Sheep Breeding Values

Australian Sheep Breeding Values (ASBVs) can be used to compare the genetic differences between animals for a range of important traits. Performance data, pedigree, and genomic data inform an animal’s ASBVs, with ASBVs also being adjusted for known non-genetic impacts on performance. ASBVs provide an indication of how an animals progeny will perform based on the genes an animal has, allowing you to compare the genetic differences between rams, enabling for informed selection decisions. It’s important to set a breeding objective prior to sale and to track your flock’s performance.

What is an index

Indexes combine multiple traits (i.e., growth, reproduction, carcass, and wool) into a single value to describe an animal’s economic value based on its relative importance to a specific production system. Indexes are a useful ranking tool within a catalogue, once sorted using an index it is important to look at individual ASBVs within your breeding objective. For more information on ASBVs and indexes scan the QR code.

What is a Percentile Band and how to use it

Percentile bands are used within Sheep Genetics to benchmark where an individual animal is sitting for a trait relative to industry. For the most up to date ASBVs and Percentile Bands visit the Sheep Genetics website, as they are updated every 2 weeks. On the Sheep Genetics search site, animals are highlighted based on the top 5 (purple), 10 (blue) and 20% (green) for each trait in the analyses.
